## Pests Worry English Farmers.

The farmers' clubs of England give a high price for magpies, jays and other birds that prey on eggs and fledglings. The result is an abnormal number of small birds that damage the crops. At a recent meeting of the Board of Agriculture in England the experts could not agree as to whether birds, on the whole, did more good than harm.

## Sleep and Memory.

Seven hours of sleep is the minimum amount required by the average person, according to Prof. Weygand of the University of Wurzburg. He ascertained experimentally that reduction of the usual period of sleep by three hours diminishes the power of the memory by one-half. Fastening, he found, had a much less injurious effect.

## Dr. Johnson Returned.

Dr. and Mrs. Johnson returned Monday from a two months trip to Chicago, Milwaukee and other cities of the Great Lakes. While in Chicago, Dr. Johnson was operated on for appendicitis by Dr. Bevin, the great Chicago specialist. Dr. Johnson spent ten days in the Presbyterian hospital undergoing treatment and as a result of the operation, which was signally successful, he returns greatly improved in health. He made special studies in surgery under celebrated surgeons in Chicago, including Drs. Grhsener, Murphy, Bevin, Billings and Webster. At Racine, Wis., he was with Dr. Sifton, of Milwaukee, in the performance of a number of delicate operations. At Rochester, Minn., he visited the surgery of the brothers Mayo, who have attained worldwide reputation for their marvels of modern surgery. As a result of his trip he is improved in health and inexperience; he expresses himself as feeling like a "man who has just inherited a fortune."

## Beer Is a Food of High Quality

It Refreshes and Strengthens the Body With Predigested Nourishment.

As a strengthening, nutritious food, physicians and scientists now agree that there is nothing, perhaps, more beneficial than pure beer. Rich in the food extractives of malt and the tonic properties of hops, pure beer nourishes the whole body.

Many people unable to take solid food have been built up by Pabst Blue Ribbon Beer. And it is just as good for the well as for the sick. Pabst Blue Ribbon Beer with your meals tones up the whole system. Taken in moderation it cannot have other than helpful, up-building, strengthening effect, free from false stimulation.

Purity and cleanliness are essential for healthful beer, just as they are essential for any other healthful food. And purity and cleanliness are watchwords in the great Pabst brewery at Milwaukee. Only the finest of malt and hops are used, and the whole Pabst process is a revelation of scientific progress, the result of sixty years' pursuit of all the best known methods in the science of brewing. A most important feature of the Pabst Brewing process is the Pabst method of making malt. It requires eight days and doubles the expense of the old four-day method, still used in many breweries, but the eight-day Pabst process is the only process by which perfect malt, containing all the nutritious food qualities of barley in predigested form, can be made.

Absolute cleanliness distinguishes the entire Pabst process, and the Pabst Blue Ribbon label is a guarantee of purity. The name Pabst always stands for purity, cleanliness and the best beer brewed.

If your food doesn't taste just right, or if your digestion is a little "off," or your appetite is poor, drink Pabst Blue Ribbon beer before or with your meals.
